Summary

Dedicated Flutter Developer with a strong foundation in building scalable, cross-platform mobile applications. Passionate about Clean Architecture, SOLID principles, and delivering premium UI/UX experiences through modern design trends. Proficient in state management using Bloc/Cubit and integrating complex backend services like Firebase and RESTful APIs to create high-performance, maintainable apps.

Skills

Languages

- Dart, Python, Java, C++

Architecture & Principles

- Clean Architecture, SOLID Principles, OOP, RESTful APIs Integration.

UI/UX

- Responsive Design, Ultra-Modern UI, Dark Mode Implementation.

Frameworks & Libraries

- Flutter, Bloc/Cubit, Get_it (Dependency Injection)

Tools & Databases

- Git & GitHub, Firebase (Firestore, Auth, Cloud Messaging), Supabase, Hive, Shared Preferences, Postman, Google Maps API.

Courses

- **Flutter Development Track** – Information Technology Institute (ITI).
- **Advanced Flutter & Clean Architecture** – Eraa Soft Academy.
- **Complete Flutter Development** – Udemy (Instructor: Eng. Tharwat Samy).
- **Clean Architecture & SOLID Principles** – (Instructor: Eng. Usama Elgendy).

Projects

EcoShid (Smart Energy Management)

- Implemented **Clean Architecture** to ensure code maintainability and scalability.
- Managed complex application states using **Cubit/Bloc** for real-time device updates.
- Developed logic for device filtering, health reporting, and energy planning analytics.
- Designed a high-end **Premium Dark Mode** UI for an ultra-modern user experience.

Islamic App

- Integrated Google Maps API for location-based services and finding nearby mosques.
- Implemented Local Notifications for automated Athan reminders and scheduling.
- Supported full localization (Arabic/English) with seamless Dark/Light mode switching.

Bookia App (E-commerce)

- Built a responsive and intuitive UI/UX for a seamless book discovery and shopping journey.
- Implemented cart management and secure checkout logic using Cubit.
- Integrated RESTful APIs to display dynamic catalogs and handle user transactions.

Taskati App (Productivity)

- Utilized **Hive** for efficient local data persistence and offline-first functionality.
- Developed priority-based sorting and filtering algorithms for task organization

BMI Calculator App

- Developed a dynamic health tracking tool to calculate Body Mass Index based on user input.
- Implemented calculation logic and result categorization using **Cubit** for efficient state management.
- Designed a clean, intuitive UI focused on high-end user experience and responsive layouts.

Education

Bachelor's Degree in Computer Science

Faculty of Computers and Information, Suez Canal University.

Grade: Very Good.

Duration: 2022-2026 (Expected).
